a solid-state image sensor having a two-dimensional array of pixels capable of

converting light incident thereon to electric signal, the pixels being arranged in a plurality of horizontal lines, the lines being arranged vertically one under another;

a color filter arranged on an incident plane of the solid-state image sensor having a line sequential primary color mosaic pattern; and

control means for selectively controlling a mode for sequential scan reading out pixel signals concerning the whole pixels of the solid-state image sensor for still picture recording,

and a mode for reading out pixel signal sums by utilizing a plurality of vertical registers each of n ($n \geq 2$, n being an integer) lines among m ($m \geq 3$, m being an integer) lines in k ($k \geq 6$, k
